2gether - Visualize

Written by Michael Cuccione and Russell Marsland

Sometimes you must live through the darkness
In order to see the light
You must visualize

(Chorus)

Close your eyes, visualize
The most beautiful girl that could be
Just one sight, memorize
Its like gazing right in of the sea

Floating down the street
She stands out like a candle light
When I look in her eyes
I know not having sight couldn't change this feeling
So I walk towards her with a vision in my mind
With a hand on my face and a smile on hers
I softly say goodnight

(Chorus)

Never dreamt of one who possessed
This gift of gold (gift of gold)
She sees beyond through the darkest clouds
She knows my soul
Will she be my girl?
Is she of this world?
Will I ever know?
When the time is right
She will be my light
She is my angel

(Chorus)

With a touch of the sand, from a far away land
Gazing at perfection, in the palm of my hand
A touch from her face, that far away place
There's no one above her
Her spirit and grace

(Chorus 3x)
